**Secret Clearance (Tier 3) - Pending Adjudication**

## EDUCATION

### University of Oklahoma

*Bachelor of Management Info Systems, Michael F. Price College of Business*

*May 2024*

*Norman, OK*

## WORK EXPERIENCE

### Deployment Engineer

*Paycom*

*May 2024 - Present*

*Oklahoma City, OK*

- Investigate, identify and help to resolve issues and outages in all environments
- Build CI/CD pipelines in GitLab with automated YAML workflows that interact with many services
- Collaborate in interdepartmental efforts to handle critical incidents in Integration and Regression
- Validate Splunk data to find issues and communicate these to the appropriate teams
- Work with team leads and release coordinators to deploy releases to production environments
- Implement the use of Kubernetes to yield high availability and horizontal scaling of our applications
- Earned the Certified Kubernetes Administrator certificate (CKA) from The Linux Foundation

### Application Development Intern

*Love's Travel Stops and Country Stores*

*May 2023 - May 2024*

*Oklahoma City, OK*

- Worked with a team using the Scrum agile project management system to efficiently complete user stories
- Learned to implement the use of Angular and the Microsoft .NET suite of tools to build web applications
- Built a UI library of Angular components with an interactive Storybook js sandbox application
- Grew closer to my coworkers by actively participating in volunteering opportunities and social events
- Networked with interns from many other companies from the OKC area at the annual InternOKC event
- Worked with GitHub making use of pull requests and contributions to interactively collaborate with my team
- Invited to continue interning with my team part time throughout the school year

### Network Automation Intern

*Love's Travel Stops and Country Stores*

*May 2022 - May 2023*

*Oklahoma City, OK*

- Built a full stack Flask application that interfaces with a REST API, a Redis message broker, a Celery task queue, and Postgres database all running in Docker
- Collaborated on automation projects using Python and PowerShell to automate lengthy employee tasks
- Implemented the use of pandas for data manipulation in Microsoft Excel
- Participated in volunteering and team-building activities so I could grow closer to my coworkers
- Connected with interns from other companies at three separate InternOKC sessions
- Invited to continue interning with my team part time throughout the school year

## SKILLS

### Languages:

• C# • HTML/CSS/SASS • JavaScript/TypeScript • Golang • Python • SQL

### Frameworks:

• Angular • Express.js • React • Flask • Electron • Storybook.js • Bootstrap

### Database Systems:

• Postgres • Microsoft SQL Server • MongoDB • Redis

### Software:

• Kubernetes • Docker • Postman • Vim • Splunk • VS Code • Visual Studio • K9s

## EXTRACURRICULAR ACTIVITIES

- Hacklahoma
- IT Student Leadership Forum
- ThunderPlains Dev Conference
- MIS Student Association
- CKA (Kubernetes Certification)
- CKAD (Kubernetes Certification)
